

Ingredion®

Our History

Innovators then, now and for the future.

For over 100 years, Ingredion Incorporated has been providing the world with innovative and on-trend ingredient solutions. Throughout our history, we have been inventors, pioneers, trendsetters and leaders. We have expanded our business both geographically through strategic acquisitions and joint ventures, as well as through advancements in product technology and operational excellence. Take a look at some of the highlights of our history and how we have grown into the leading global ingredients solutions provider we are today.

1900-1909

1906

The Corn Products Refining Company is created through the merger of the leading corn refiners in the United States. Corn Products expands into Europe.

Early 1900s

National Starch is acquired by Corn Products Refining Company.

1908

ARGO laundry starch is introduced. Construction begins on Argo corn refining plant in Bedford Park, Illinois. It remains the Company's largest facility.

1910

National advertising of KARO syrup begins.

1911

MAZOLA is used as a trademark for refined corn oil for the first time.

1919

Corn Products acquires Canada Starch Company. The company declares its first-ever stock dividend.

1910-1919

1920

Corn Products sells National Starch.

1923

Corn Products receives patent for crystalline dextrose. CERELOSE® is first used as trademark for pure dextrose in the United States.

1928-1930

Corn Products establishes refining operations in Argentina, Brazil and Mexico.

1928

BOSCO is used as a trademark for chocolate flavored malt syrup for the first time.

1920-1929

1930-1939

1930

Corn Products expands into Asia, Korea and Japan.

1933

Corn Products establishes corn refining operations in Colombia, where it is the country's number-one corn wet miller in terms of grind capacity.

1938

KARO is used as a trademark for waffle syrup in the U.S. for the first time.

1940-1949

1940s

The Company provides greater services for both military and civilian uses. Most notably, its products appear in penicillin.

1947

NIAGRA cold water laundry starch is introduced.

1948

The Company opens the George M. Moffett Research Laboratories.

1950-1959

1955

Corn Products creates cationic starch, which is still widely used as a binder in the paper-making industry.

1958

Corn Products Refining Company merges with The Best Foods, Inc., to become Corn Products Company. The Company establishes operations in Uruguay.

1960-1969

1960

CERELOSE® Dextrose is introduced as a pharmaceutical grade intravenous solution.

1961

Corn Products expands to Chile.

1962

The largest corn refining business in Pakistan joins Corn Products.

1967

Corn Products begins production of high fructose corn syrup at its Argo plant. The Company expands to Malaysia.

1969

Corn Products Company changes its name to CPC International Inc.

1970-1979

1974

Corn Products extends reach into Ecuador and further into South America.

1980-1989

1981

The Company constructs three new North American corn refining plants in Stockton, California; Winston-Salem, North Carolina; and Port Colborne, Ontario.

1984

Canada Starch Company joins with a London, Ontario corn refiner to become Casco.

1987

The Company sells its European operations to focus on those markets with the greatest growth potential.

1990-1999

1994-1996

The Company rebuilds its Colombia plant and establishes a joint venture with Mexico's largest corn refiner, Arancia.

1997

CPC establishes operations in Thailand and increases its presence in Brazil.

1998

Corn Products International spins off from CPC International and acquires majority interest in Arancia in Mexico.

1999

Corn Products expands South Korea presence through joint venture with Doosan Group.

2000-2011

2000

The Company acquires the largest corn refiner in Argentina.

2001

The Company increases ownership of the South Korean business.

2002

Corn Products opens a new facility in Thailand—the largest tapioca processing facility in the world.

The Company increases its ownership in Mexican Subsidiary to 100%.

2004

The Company enters into a joint venture in China, establishing Corn Products' first manufacturing presence there. Corn Products launches the FARMAL® brand of cosmetic and personal care ingredients and acquires U.S.-based functional food ingredient manufacturer, GTC Nutrition.

2005

The Company becomes the sole owner of its South Korean business.

2006

Corn Products celebrates its centennial anniversary of business incorporation and launches EXPANDEX® modified tapioca starch. The Company opens the only short-chain fructooligosaccharides manufacturing channel in North America.

2007

Corn Products acquires two sugarless sweetener makers: Brazilian Getec Guanabara Quirnica Industrial S.A. and the food business of U.S.-based SPI Polyols.

2000-2011
(CONTINUED)

2008

Stevia based ENLITEN® brand of high-intensity, low-calorie sweeteners is launched.
