Customer Assurance Statement

MELAMINE

The Ingredion EMEA Companies operate a global supply chain and each source products from multiple locations in order to best service the needs of their customers, and to ensure continuity in supply. In addition, each company operates robust quality assurance systems to ensure the quality and integrity of products throughout the supply chain.

The Ingredion EMEA Companies each confirm that it does not intentionally add melamine or melamine-related compounds during its manufacturing processes. The potential risk of coincidental adulteration of protein-containing food ingredients with melamine has caused its global Quality Assurance Group to conduct a comprehensive audit of its supply chain and to initiate a testing program to monitor for melamine contamination in that company's products. Each Ingredion EMEA Company confirms that its testing program has found no detectable level of melamine in its product line.

The company's approved Chinese raw material suppliers are subject to audit and control based on an assessment of the risk associated with that supplier. Further suppliers have confirmed they do not intentionally add melamine into their products.

Each Ingredion EMEA Company continues to operate robust systems to ensure the quality and integrity of all its products no matter what their origin. This statement supersedes all related previous statements issued by any of the Ingredion EMEA Companies with respect to melamine.
