Preservatives must be explicitly authorised as defined in the European Cosmetics Regulation (EC) No 1223/2009<sup>i</sup>. The above products do contain substances listed in Annex V of the European Cosmetics Regulation.

The FOAMATION® PC Q ULTRA foaming agent product contains 0.1% sodium benzote, as a preservative.

The FARMAL™ CS 3757, FARMAL™ 2IT, NATIVACARE™ 5600 and NATIVACARE™ 8600 starch products and the FARMAL™ MS 6822 and FARMAL™ MS 6135 modified starch product contain residual sulphur dioxide. Whilst not intended to function as a preservative, sodium metabisulphite is used as a processing aid in the extraction of starch from the maize or tapioca and as a result these products contain residual sulphur dioxide. Subsequent processing of the products and the application of various washing stages results in the neutralisation of SO<sub>2</sub> and therefore we expect only very low levels in the finished products. Further information on residual SO<sub>2</sub> levels can be found in the Ingredient Product Information Files.

Please note, the information given in this statement is in relation to products supplied by any of the Ingredion EMEA Companies and is based upon their interpretation of relevant legislation.
