Guadalajara, Jalisco, Mexico. August 2022.

RE. GMO Statement, National Bioengineered Food Disclosure Standard – Refined Products, BE Exempt.

Dear Customer,

We are pleased to affirm that the following products are blends of refined products and/or non-GMO grade products, therefore exempt from the USDA National Bioengineered Food Disclosure Standard (NBFDS).

- Maltodextrin
- Hydrocolloids Non-GMO
- Vegetal proteins IP
- Corn syrup solids
- Starch IP

Ingredion Mexico offers quality ingredients, which complies with the US, Mexico & Canada guidelines for food safety and quality, including the use of genetically modified inputs. Although the agricultural products used to produce these ingredients may come from genetically modified crops, these ingredients go through a process of high refining, which denatures and removes any trace of DNA or remaining protein, not being susceptible to genetic identification by conventional techniques (ELISA or PCR); therefore, these products do not require a labeling as established by the USDA's National Bioengineered Food Disclosure Standard (NBFDS).

Currently, Ingredion does not offer materials (Food Systems) that support non-GMO label requirements.

The intent of this information is to support our customers efforts to develop and implement an appropriate labeling strategy for products containing Ingredion Mexico ingredients or additives.

In all respects, the ultimate decision on how to identify and label ingredients or additives remains with our customers. We urge you to review the relevant regulations carefully and to seek appropriate legal counsel as you determine the labeling requirements applicable to your products.

Thank you for your interest in Ingredion's products. Please contact us if we can be of any further assistance.

Sincerely,

Victor González

Quality Assurance Manager
