Re. Declaration of GMOs, National Standard for the Disclosure of Bioengineered Foods - Refined Products, Exempt from BE.

Dear Customer,

We are pleased to state that the following products are highly refined or blends of refined products with high intensity sweeteners, exempt from the USDA National Bioengineered Food Disclosure Standard (NBFDS).

- | | | |
|-----------------|-----------------------------|-----------------------|
| • Allulose | • Corn syrup, high fructose | • Blend of Sweeteners |
| • Caramel color | • Corn syrup, glucose | • Corn syrup solids |
| • Dextrose | • Maltodextrin | • Sorbitol |

Ingredion Mexico offers quality ingredients, which complies with the US, Mexico & Canada guidelines for food safety and quality, including the use of genetically modified inputs. Although the agricultural products used to produce these ingredients may come from genetically modified crops, these ingredients go through a process of high refining, which denatures and removes any trace of DNA or remaining protein, not being susceptible to genetic identification by conventional techniques (ELISA or PCR); therefore, these products do not require a labeling as established by the USDA's National Bioengineered Food Disclosure Standard (NBFDS).

On the other hand, if a specifically non-GMO product is required, Ingredion offers materials that supports non-GMO labeling requirements thanks to the Identity Preserved program:

TRUETRACE® Certified Program: For greater visibility and traceability, we recommend our TRUETRACE® certified products, which come from identity preserved crops to guarantee only the use of non-GMO corn.

The intent of this information is to support our customers efforts to develop and implement an appropriate labeling strategy for products containing Ingredion Mexico ingredients or additives. In all respects, the ultimate decision on how to identify and label ingredients or additives remains with our customers. We urge you to review the relevant regulations carefully and to seek appropriate legal counsel as you determine the labeling requirements applicable to your products.

Thank you for your interest in Ingredion's products. Please contact us if we can be of any further assistance.

Sincerely,

Americas Quality Documentation

Ingredion México
