Re: **Lot or Batch Number**

Ingredion uses a 10-digit code for product lot or batch number identification. The significance of the numeric values is illustrated below:

Digits	Possible	Numbers Meaning
1 - 3	000 – 999	Internal location code
4	0 – 9	Last digit of year
5 - 7	001 – 366	Date of manufacture (Julian date)
8 – 10	000 – 999	Sequential number of the lot produced at the location on the date of manufacture

A product with the number 1365007002 was produced at location (136) on January 7, 2005 (5007) and was the third lot (002) of this product produced on that day.
