RE: GMO Statement

The products with the PIN numbers listed below are not produced under an identity preserved (IP) program for non-GMO materials and detectable levels of genetically modified DNA may still be present in food starch products. Please note that this list is specific to the PIN number given.

For compliance with EU genetically modified food labeling regulations as well as consumer friendly front of package claims, which may require additional documentation and traceability, Ingredion offers the following option:

- **TRUETRACE® Program:** Provides visibility and tracing of identity-preserved non-GMO corn and potato. Additionally, the program offers a more comprehensive non-GMO statement as well as Non-GMO Project verified certificates for many of our products.

The intent of this information is to support our customers efforts to develop and implement an appropriate labeling strategy for products containing Ingredion Incorporated ingredients or additives. In all respects, the ultimate decision on how to identify and label ingredients or additives remains with our customers. We urge you to review the relevant regulations carefully and to seek appropriate legal counsel as you determine the labeling requirements applicable to your products.

Thank you for your interest in Ingredion's products. Please contact us if we can be of any further assistance.

North America Quality Assurance
Ingredion Incorporated

Nothing herein is intended as legal or regulatory advice, nor should you rely on the information contained in this position statement, which is presented solely for your independent consideration, review and verification. The information is presented in good faith as of the date set forth herein and Ingredion Incorporated assumes no obligation to update this position statement. Ingredion Incorporated makes no representations or warranties, and shall have no liability, regarding this position statement or your use of the information contained herein
