

RediPRO™ 7000

33240103

RediPRO™ 7000 is a high performance anionic liquid additive designed to improve dry strength generation and boost wet strength efficiency. As a result of maintaining system charge balance, RediPRO™ 7000 extends cationic additive effectiveness over a wide addition range.

Product Specifications

	Min.	Max.
pH (as received)	5.0	7.0
Active Solids, %	24.0	26.0

Physical Properties

	Typical
Color	Light Brown
Form	Liquid
Specific Gravity*	1.13
Density* (Lbs/Gallon)	9.22
Dry Lbs Starch/Gallon*	2.31

Viscosity*

Brookfield, cps (#5 Spindle/ 25 RPM)	2,000 – 5,000
---	---------------

* Data is a profile of typical batches. Actual data may vary from data listed above.

Preparation

RediPRO™ 7000 can be used as received or diluted with water to 1-3% active solids prior to application. Metering equipment is available for a trial period upon request.

Certification

Kosher pareve

Packaging and Storage

RediPRO™ 7000 is packaged in returnable tote bins and bulk tank trucks. The product must be stored above 10°C in a clean, dry area away from heavily aromatic material. Keep containers closed when not in use.

Shelf Life

Three months for maximum performance in the original, unopened container.

Regulatory Data

United States/Canada

RediPRO™ 7000 is approved for use under FDA 21 CFR 176.170.

Features and Applications

The addition point is dependent on other additives utilized and furnish conditions. Most often RediPRO™ 7000 is used in conjunction with a cationic additive and can be highly effective in thick or thin stock addition points.

Technical Service Representatives are available to assist with product application and performance optimization.
